Computer & Internet Vocabulary

PRINT THIS PAGE FIRST

Listed below are some words related to computer and internet use. You will complete several short activities that will help you add these words to your vocabulary.

CPU	hard drive	motherboard	software
computer network	AUP	internet	ISP
world wide web	web browser	URL	search engine
bandwidth	firewall		

Activity #1 – Definitions

First, write the words in alphabetical order on the shorter lines below. Then, use an on-line dictionary to "look up" the definition for each word. You might also be able to use your own knowledge or the videos you've already watched to come up with a definition. Write a definition for each word on the longer lines below. For acronyms, list what the acronym stands for as well as its definition.

	Word	Definition
1.		
2.		
3.		
4.		
5.		
6.		
7.		
8.		
9.		
10.		
11.		
12.		
13.		
14.		

Activity #2 – Be creative

Use as many of the vocabulary words as you can to write a short, creative story. Although your story can/should be fun and creative, it must also make sense and show correct use of the vocabulary words. Be sure to use correct spelling, punctuation, and grammar.

Type your story in Word 2010, save it in your documents (*Other* folder, call the file *computer vocab*) and print it when you're finished. On your printout, circle the vocabulary words that were used in the story (you must use at least 10). Staple it to this worksheet and turn it in.
